STUDENT ACADEMIC DASHBOARD

Consolidated Website Report

Project type HTML and external CSS webpage	**Stylesheet** SAD.css
Core sections Dashboard, results, attendance	**Additional sections** Timetable and announcements

Report contents

- Recreated visual previews of the webpage layout
- Project structure and key HTML/CSS features
- Notes about sample data and current functionality

Important: The previews in this PDF are recreated visual representations based on the supplied code. They are not screenshots captured from a live browser.

1. Dashboard and Semester Results

The opening section introduces the dashboard and uses a definition list to display example student profile fields. The results section presents illustrative marks and grades in a semantic HTML table.

Student Academic Dashboard

Your student profile with example academic information.

Dashboard | Results | Attendance | Timetable | Announcements

Dashboard

Student name
Giri Naga Charan K
Roll number
26000935
Branch
B.Tech CSE - AIML
Semester
Semester 1

Semester Results

Illustrative marks and grades only; not official results.

Subject	Marks	Grade
Python	86	A
Web Development	90	A
Computational Maths	91	A+
Critical Thinking and Logical Reasoning	95	A+
Professional Communication	88	A
Generative AI	83	A

Student Academic Dashboard — fictional demonstration page

Preview note: The student details and grades shown are reproduced from the supplied demonstration HTML. The page itself labels the marks as illustrative, not official.

2. Attendance and Examination Timetable

The attendance table lists classes attended, total classes, and a percentage for each subject. The timetable uses dates, subject names, and session times to show a sample examination schedule.

Student Academic Dashboard

Your student profile with example academic information.

Dashboard | Results | Attendance | Timetable | Announcements

Attendance

Fictional attendance figures for demonstration.

Subject	Attended	Total	Attendance
Python	36	40	90%
Web Development	34	40	85%
Computational Maths	27	30	90%
Critical Thinking and Logical Reasoning	24	30	80%
Professional Communication	19	20	95%
Generative AI	18	20	90%

Examination Timetable

Date	Subject	Session
2 Nov 2026	Python	9 am–12 pm
5 Nov 2026	Web Development	9 am–12 pm
9 Nov 2026	Computational Maths	2–5 pm
12 Nov 2026	Critical Thinking	9 am–12 pm
16 Nov 2026	Professional Comm.	2–5 pm
19 Nov 2026	Generative AI	9 am–12 pm

Student Academic Dashboard — fictional demonstration page

The schedule is explicitly described in the HTML as fictional. Confirm any real dates and times with official college communications.

3. Timetable and Announcements

The final content area displays the examination schedule alongside three announcement cards: library study hours, Python lab practice, and an examination preparation session.

Student Academic Dashboard

Your student profile with example academic information.

Dashboard | Results | Attendance | Timetable | Announcements

Examination Timetable

Date	Subject	Session timing
2 November 2026	Python	9:00 a.m. – 12:00 p.m.
5 November 2026	Web Development	9:00 a.m. – 12:00 p.m.
9 November 2026	Computational Maths	2:00 p.m. – 5:00 p.m.
12 November 2026	Critical Thinking and Logical Reasoning	9:00 a.m. – 12:00 p.m.
16 November 2026	Professional Communication	2:00 p.m. – 5:00 p.m.
19 November 2026	Generative AI	9:00 a.m. – 12:00 p.m.

Announcements

Library study hours

The library will remain open until 8:00 p.m. during the sample examination period.

Python lab practice

Supervised Python practice on Friday from 2:00 p.m. to 4:00 p.m.

Examination preparation session

Sample revision session on 28 October in the main seminar room.

4. Project Summary and Features

Page structure

The HTML uses semantic elements including **header**, **nav**, **main**, **section**, **article**, and **footer**. Navigation links point to section IDs, allowing users to jump to Dashboard, Results, Attendance, Timetable, and Announcements.

Tables and accessibility

Tables include captions, table headers, and scope attributes. Sections use aria-labelledby to associate each section with its heading. The timetable uses time elements with machine-readable date values.

CSS styling

The external stylesheet SAD.css sets a navy-blue and pale-gray palette, Arial typography, spacing, rounded white section cards, subtle shadows, hover styling for navigation and table rows, and announcement cards with a blue accent border.

Functionality boundaries

The supplied code is a static HTML/CSS demonstration. The navigation links work as in-page anchors, and hover effects are visual. The marks, attendance, schedule, and announcements are sample content; there is no login, live data connection, automatic calculation, or dynamic update logic in the provided code.

Files expected for the webpage

• HTML file containing the dashboard structure
• SAD.css — external stylesheet linked in the HTML head
